National Strategy on Gender and Climate Change,2013; Tanzania, Un. Rep. of

|

Description / Abstract

The National Strategy for Mainstreaming Gender in Climate Change is outlined into six thematic areas each comprising sub-sections on women as agents for change. Other sub-sections include; a situation analysis and the state of gender, a set of recommendations and examples of actions for implementation. The strategy is expected to be a useful instrument in the national efforts of addressing the impacts of climate change. Users of this strategy will find it beneficial and apply in implementation frameworks to reduce the impacts of climate change.
