

RESOURCE

Gender-Responsive Budgeting: Analysis of Budget Programmes from Gender Perspective

|

Description / Abstract

The manual is intended for use of public officials and provides guidance in the different steps of GRB analysis. Even though it is structured in a simple way, it is recommended that the manual is used in parallel to providing trainings or workshops for public officials to explain the process of analysis.

The manual is a collaborative effort between three international organizations and projects involved in GRB work in Ukraine with the joint objective to provide support to the introduction of Gender Responsive Budgeting in Ukraine. UN Women, the Sida funded "Gender Budgeting in Ukraine" project and Friedrich Ebert Foundation joined their efforts to develop a simple methodology of gender budget analysis which is a crucial step in introducing gender responsive budgeting.
